

Rings - Don't Cover the Gap!

'Rings - Don't Cover the Gap!', an addictive new game, available on the Apple App Store

A easy to play, simple and addictive game, now available for iOS devices.

June 8, 2016 - Fremont, CA - Cyrush, LLC has launched an addictive new game, 'Rings - Don't Cover the Gap!' for iOS devices.

With simple tap-to-play controls, 'Rings - Don't Cover the Gap!' is both easy to learn, exciting to play, and extremely difficult to master. By tapping to stop revolving rings, you must perfectly line up gaps to prevent those in successive rings from shrinking. To reward you for accuracy, you will receive bonus multipliers for a streak of 4 perfect ring alignments or more. Be careful, if you completely cover the gap, the game ends. Try to climb the global leaderboards, and achieve the world's highest score! Compete with your friends and challenge them to beat your highest score.

'Rings - Don't Cover the Gap!' is currently available for free on all iPhones running iOS 8.0 or newer on the **App Store**.

Cyrush, LLC is an independent publisher of mobile and online games. We are the creators of **brainychess.com** and the associated mobile app, currently available on the App Store, which together have revolutionized the way people interact with chess. Visit us online at **www.cyrush.com**.
